

# EXPLORING FOR COPPER IN LATIN AMERICA

Solis Minerals is a Latin American focused mining exploration company. The Company recently acquired an option to purchase a 100% interest in the Mostazal copper project in Chile's Atacama Desert, one of the world's premier copper production jurisdictions. The Company also holds a 100% interest in a package of highly prospective IOCG and porphyry copper projects in southwestern Peru within the country's prolific coastal copper belt—source of nearly half of Peru's copper production.

## LEADERSHIP

### Chris Gale, Chairman

Executive Director, Latin Resources Ltd (ASX:LRS), former Chairman of the Council on Australian Latin American Relations, member of the Australian Institute of Company Directors (AICD).

### Jason Cubitt, President & CEO

25 years experience as a Founder and Institutional Investor and management consultant, director of investments for Vertus Investment Advisory and co-founder Ascenta Group.

### Fred Tejada, Technical Director

Ex-Phelps Dodge (Country Manager, Phillipines) and Panoro Minerals, where he directed the resource definition drilling of its two major copper projects in Peru.

### Tony Greenaway, Head of Exploration

Ex-Hancock Prospecting, Talisman Mining, senior geologist with over 25 years of international mining and exploration experience in Australia, Latin America (Chile & Mexico), Asia (Indonesia) and Africa.

### Angelo Peri, Country Manager

Ex-Sumitomo head of generative and exploration operations in Chile 2011-2020, also Vale, Phelps Dodge, Cyprus Amax – 35 years experience.

### Three large scale, high quality projects

Recent acquisition in Chile, and two 100% owned projects in Peru.

### Drill-ready multi-kilometre porphyry target

Scheduled 2021 drilling at Mostazal to test multi-kilometre interpreted porphyry feeder system, as well as enriched mantos-style surface layer.

### Excellent capital structure

33m shares outstanding, 33% insider ownership.

### Experienced management

Former Sumitomo, Phelps Dodge, Hancock, with deep corporate and financial experience.

## STOCK CHART (12-month)

# Our Projects

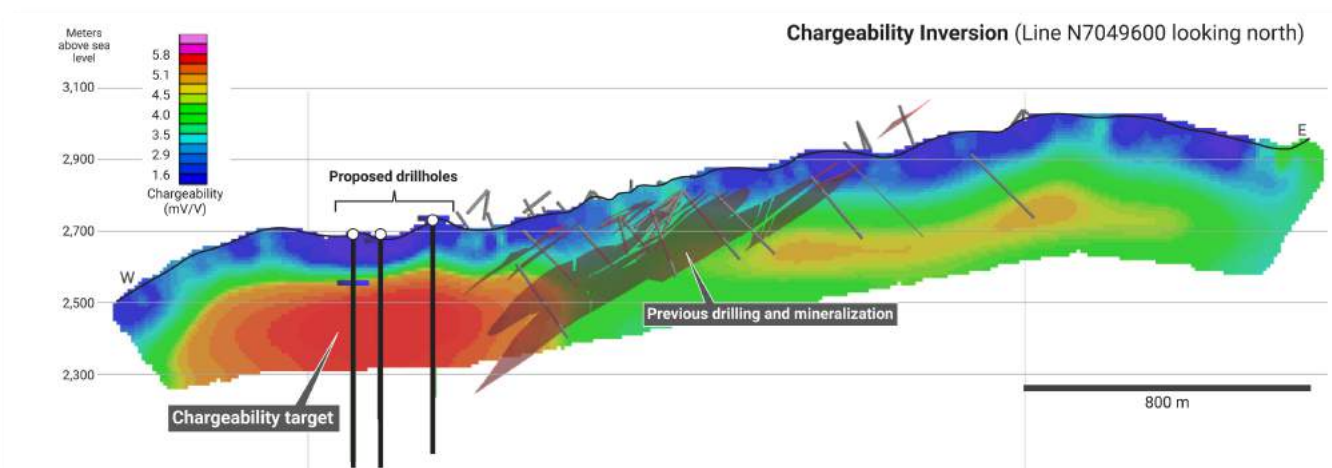

- > **MOSTAZAL**
- > Interpreted classic large-scale porphyry system underlying high-grade copper mineralization at surface
- > Geological and geochemical studies with 60 drill holes totaling 11,000m focused on shallow mineralization
- > Historic resource reported of 10 million tons grading 0.95% copper, 8g/t silver \*
- > Historic production of 120,000 tons at a copper grade of 1.8%

- > **ILO NORTE**
- > 77 km<sup>2</sup> of licenses, just north of Southern Peru Copper's Ilo copper smelter & refinery
- > IOCG with high-grade skarn mineralization
- > Jurassic-age volcanic sediments
- > 10 km-long alteration system
- > 15,348 m of historical drilling - including 0.93% Cu over 30 metres

- > **ILO ESTE**
- > 32 km<sup>2</sup> of licenses, just east of Ilo smelter/refinery
- > Large eroded porphyry with gold, silver and molybdenum
- > Jurassic-age volcanic sediments
- > Mineralization mapped over 3 km<sup>2</sup>
- > 9,523 m of historical drilling

First planned drill test of buried porphyry copper target at Mostazal

\* It is unknown if the historical Indicated estimate uses the current resource categories as defined by CIM; the differences to the CIM categories are not known. To upgrade and verify the historical Indicated estimate the Company would need to verify the historical drilling and engage the services of a professional resource estimator.
